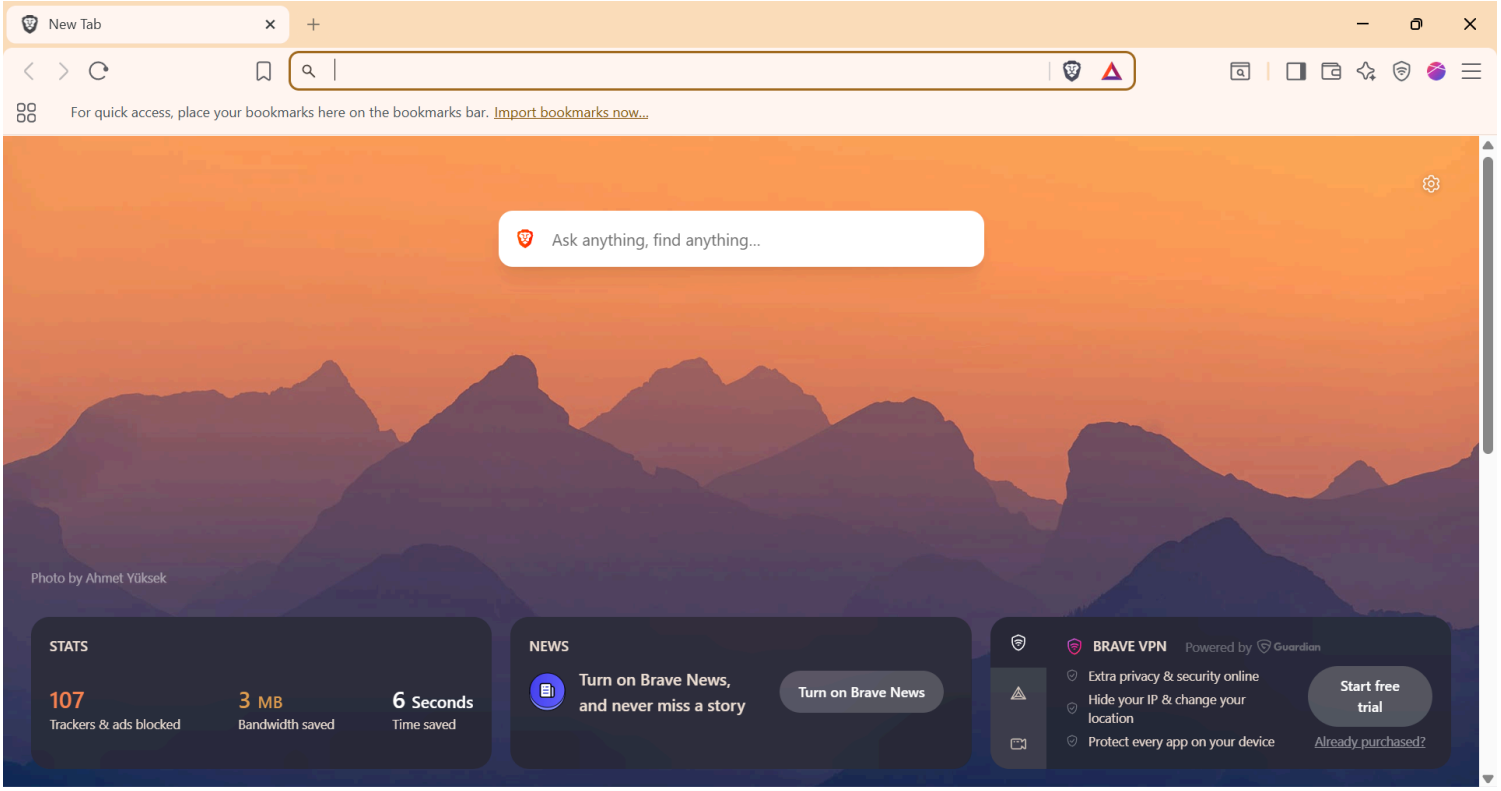
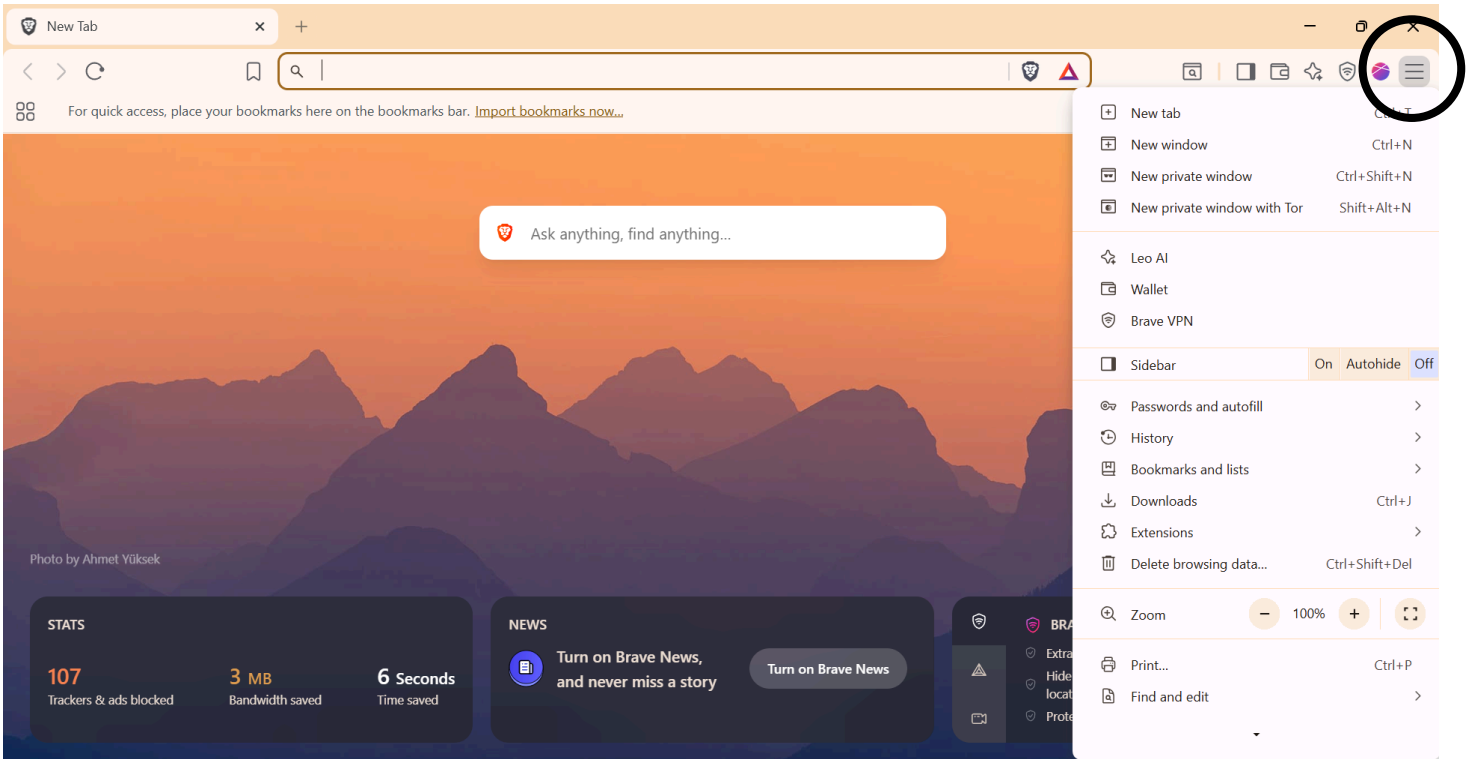
Follow these steps to install the **YouTube Homepage and Shorts Block Extension** on your browser after downloading the files from GitHub.

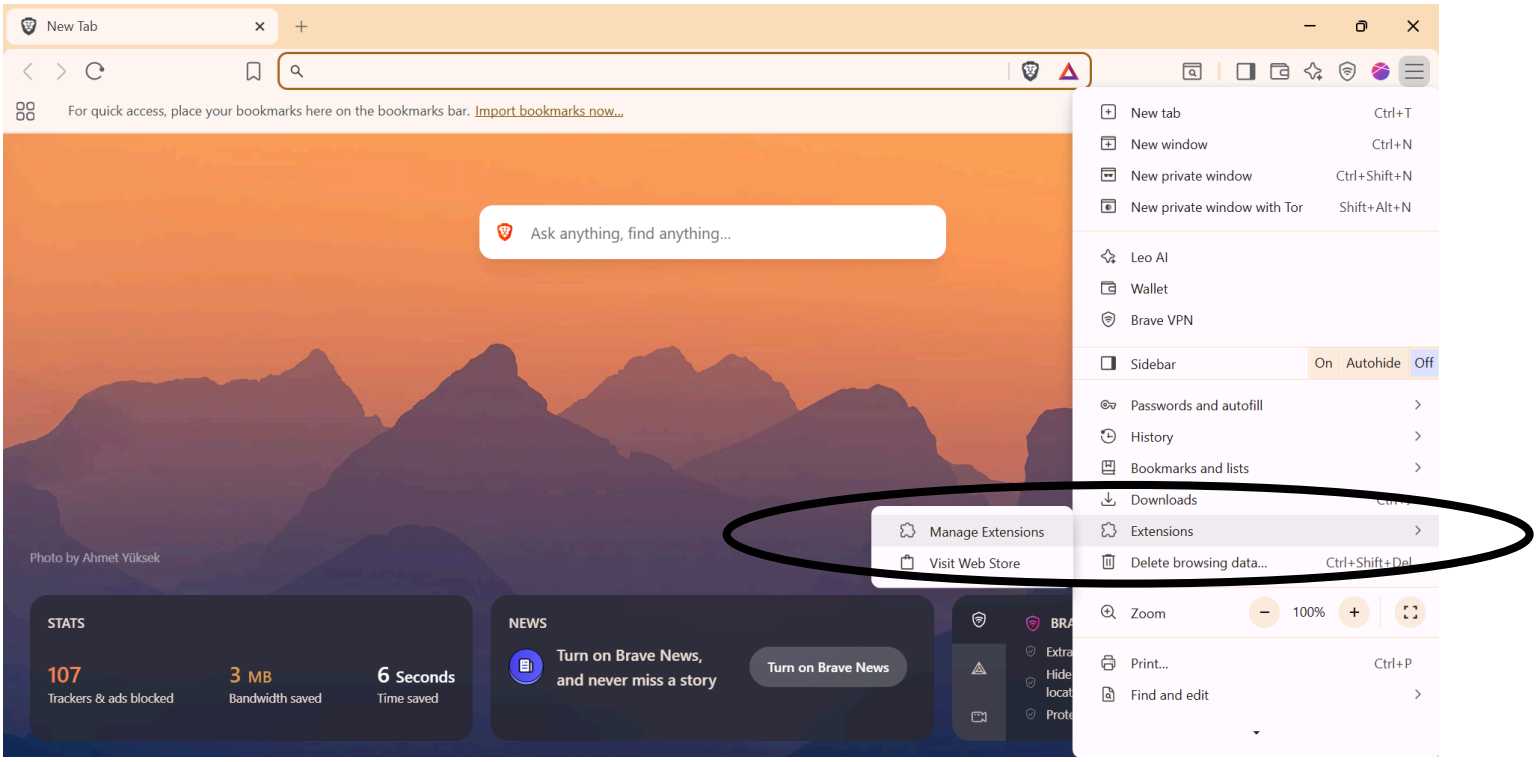
Step 1: Open your preferred Browser



Step 2: Click on 3 lines on right

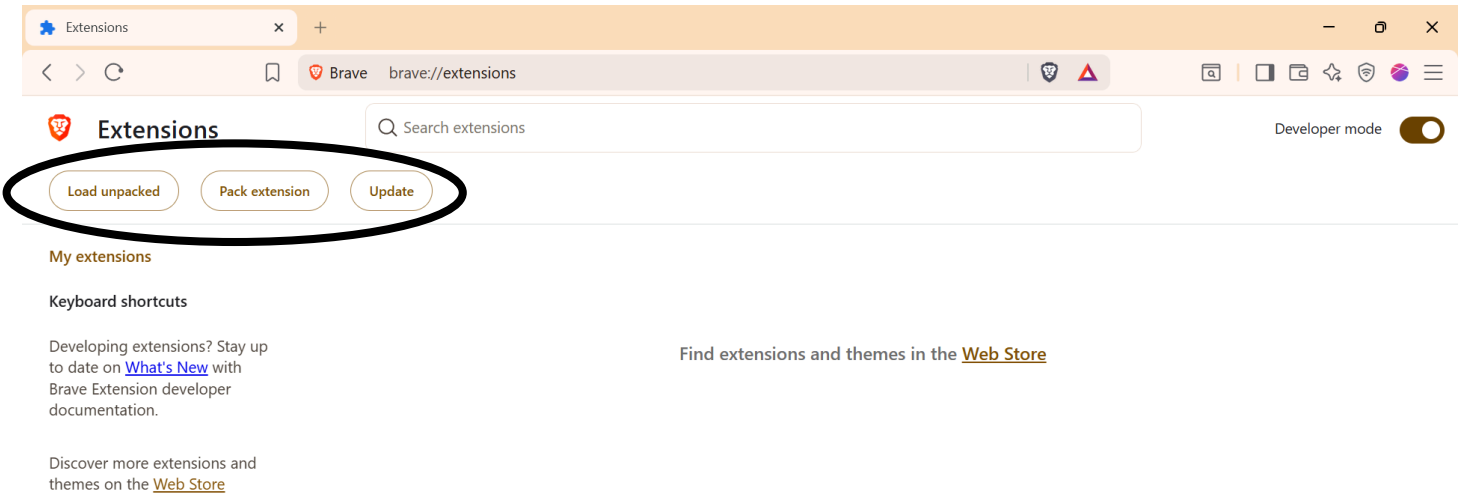


Step 3: Click on “Extensions” and then click “Manage Extensions”

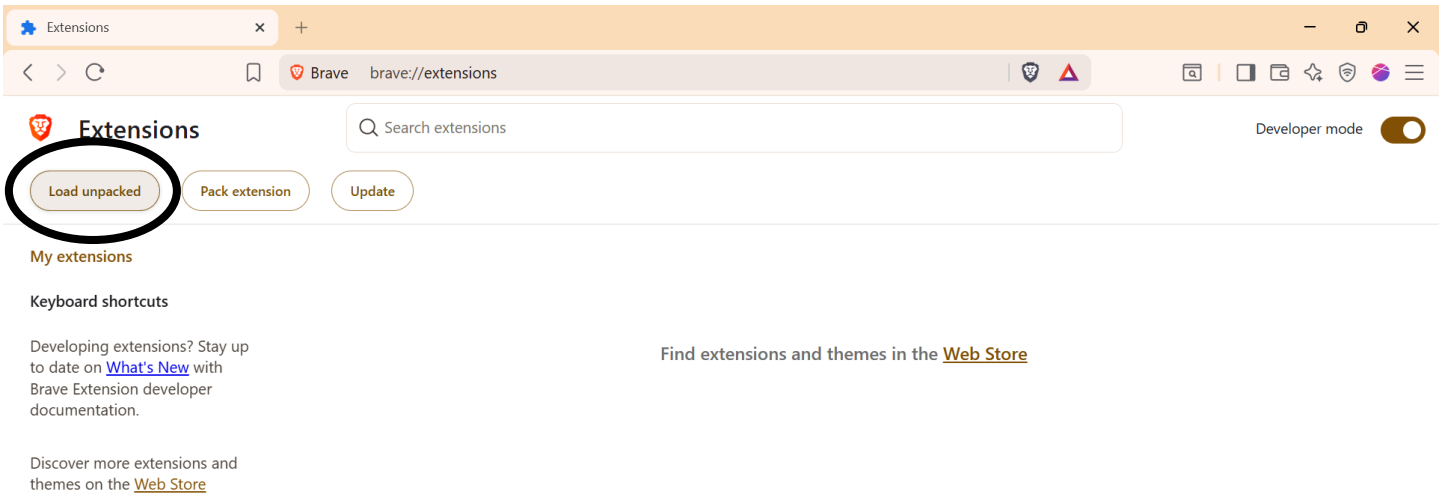


Step 4: Enable Developer Mode by Toggle on the “Developer mode” on the right

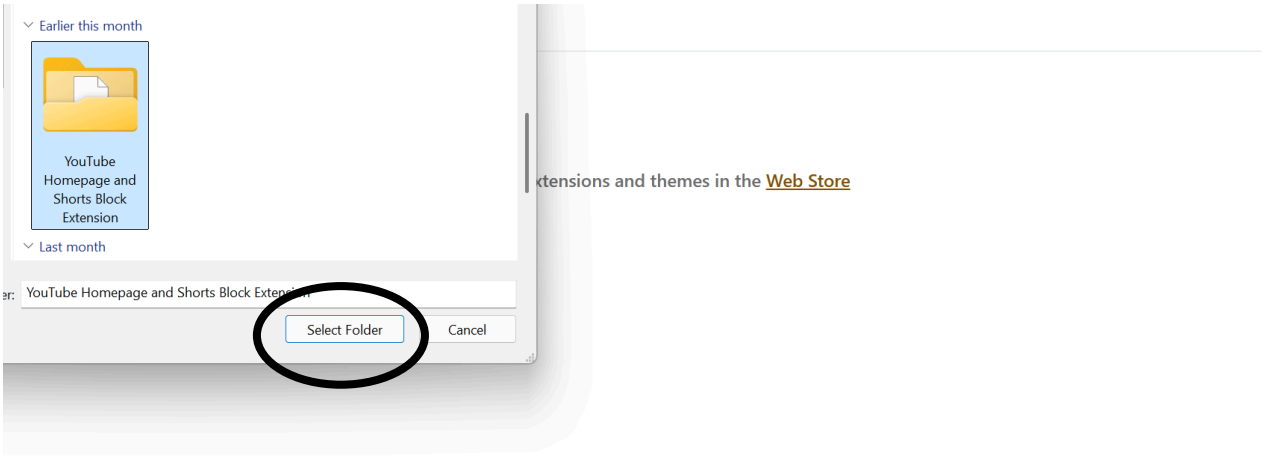
It will show three more options like this



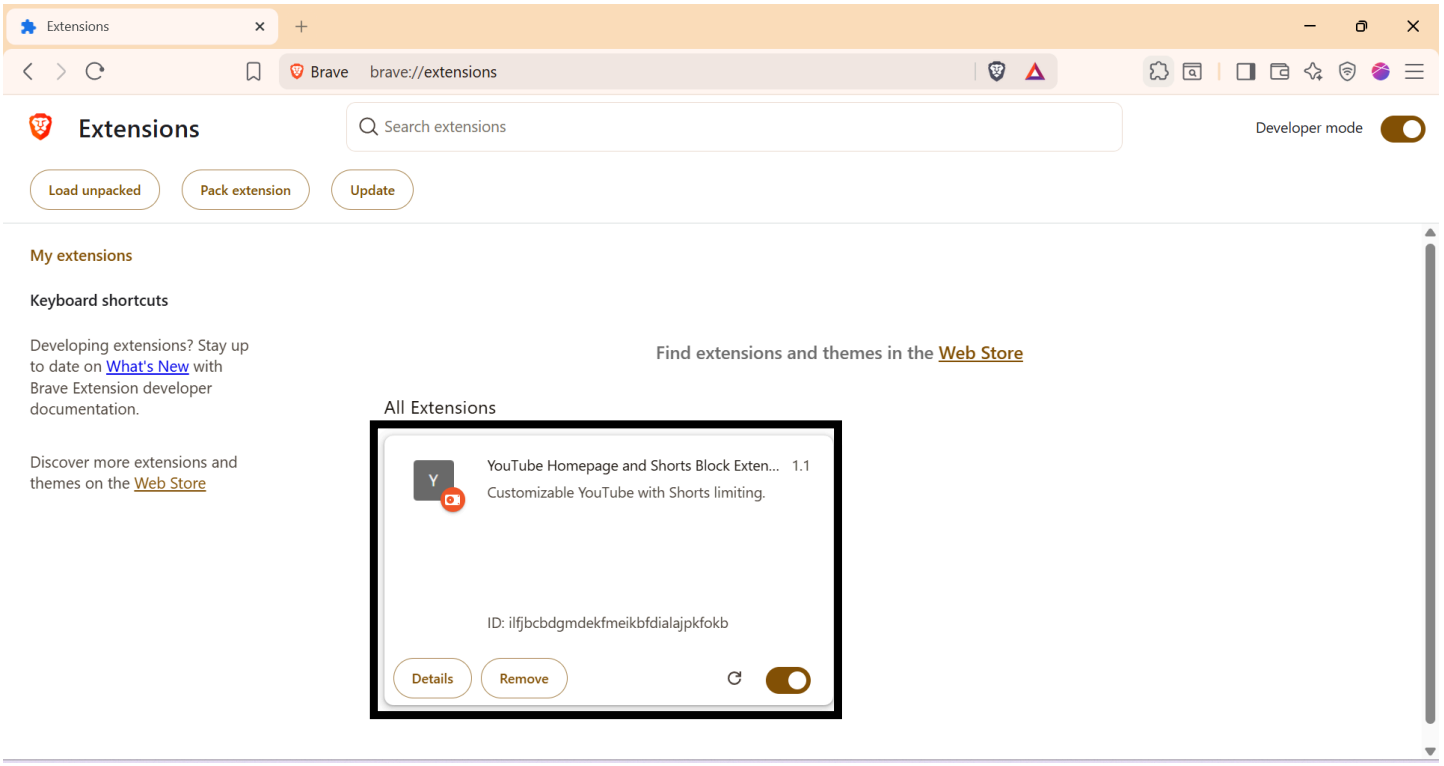
Step 5: Load the Extension by Clicking on “Load unpacked” on the left. Navigate to the folder where you saved the files.



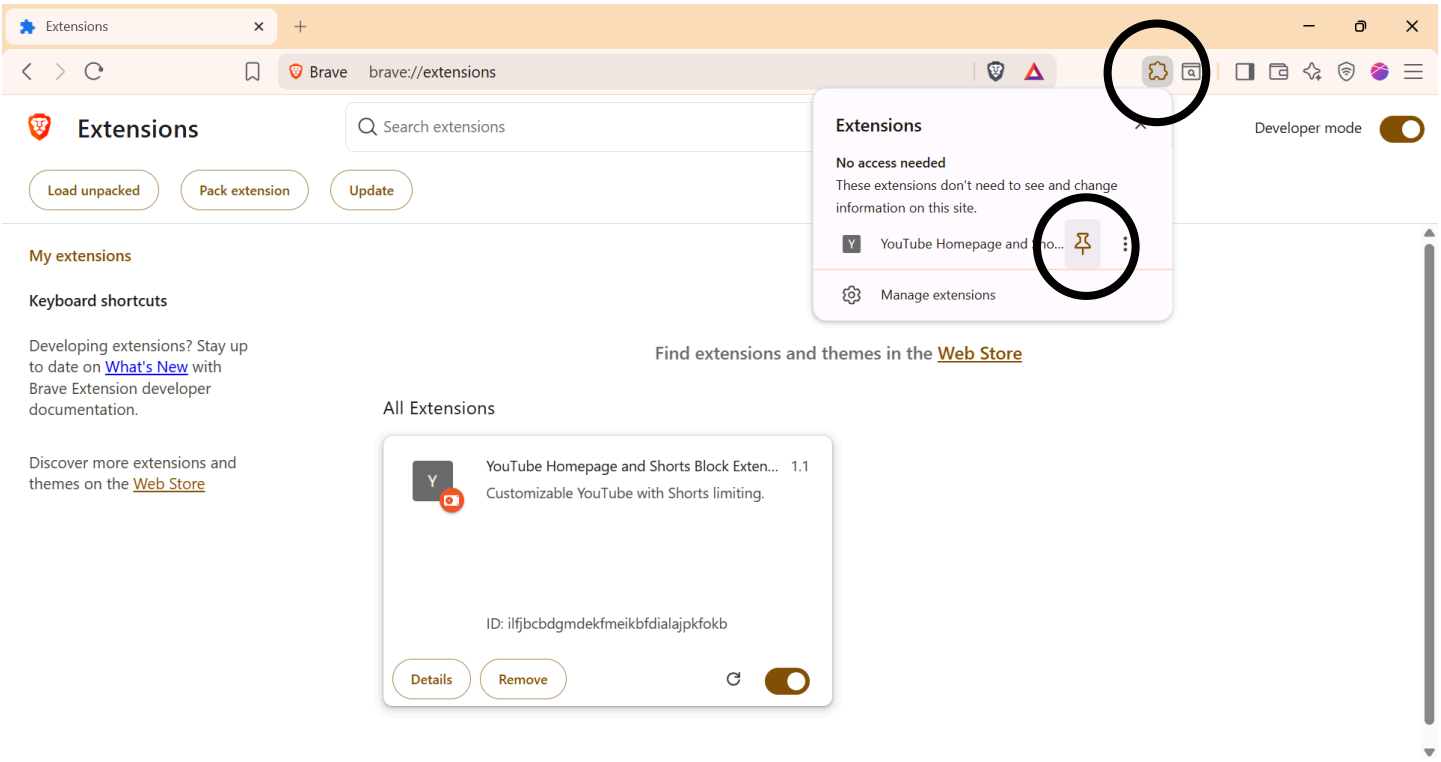
Step 6: Select the entire folder “YouTube Homepage and Shorts Block Extension” and click "Open" or "Select Folder".



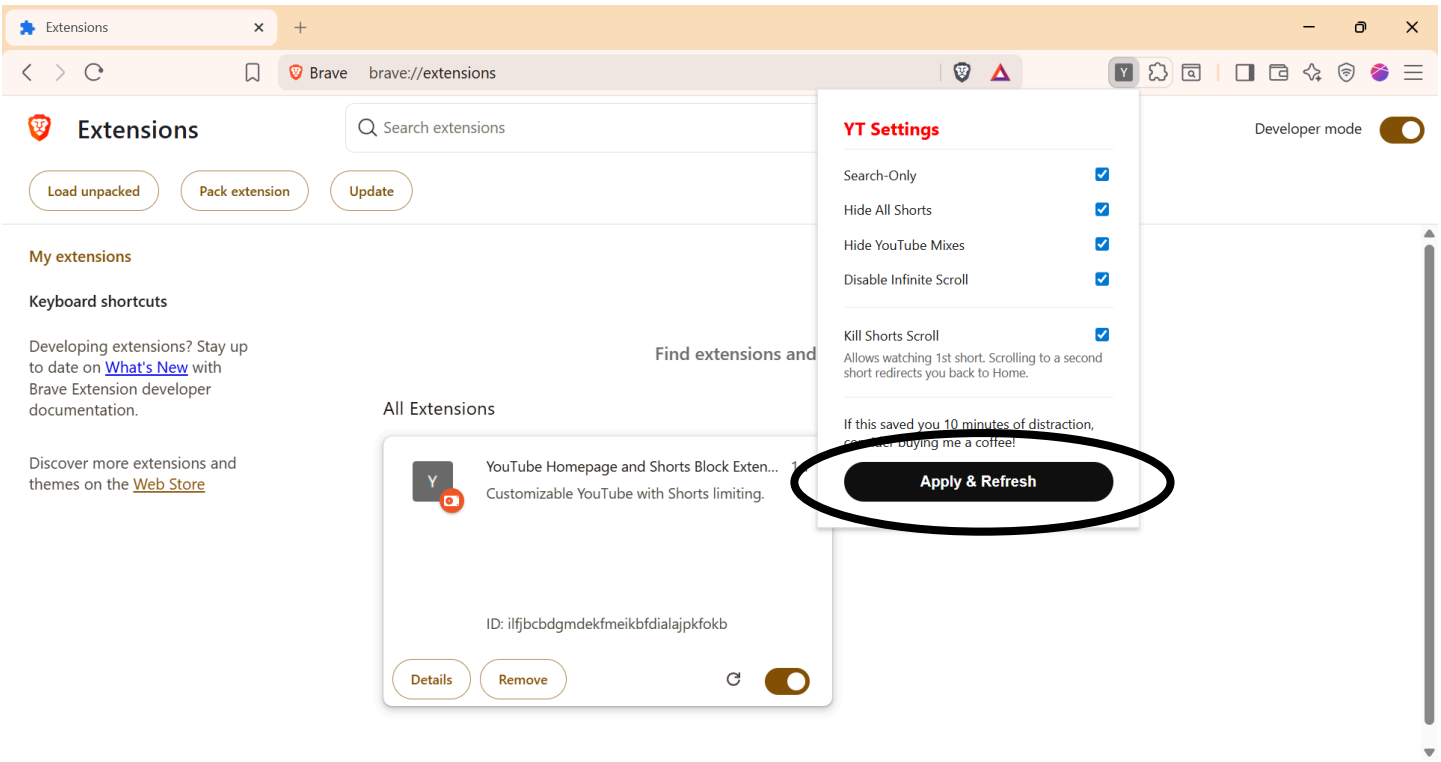
You will see Extension Added to your browser



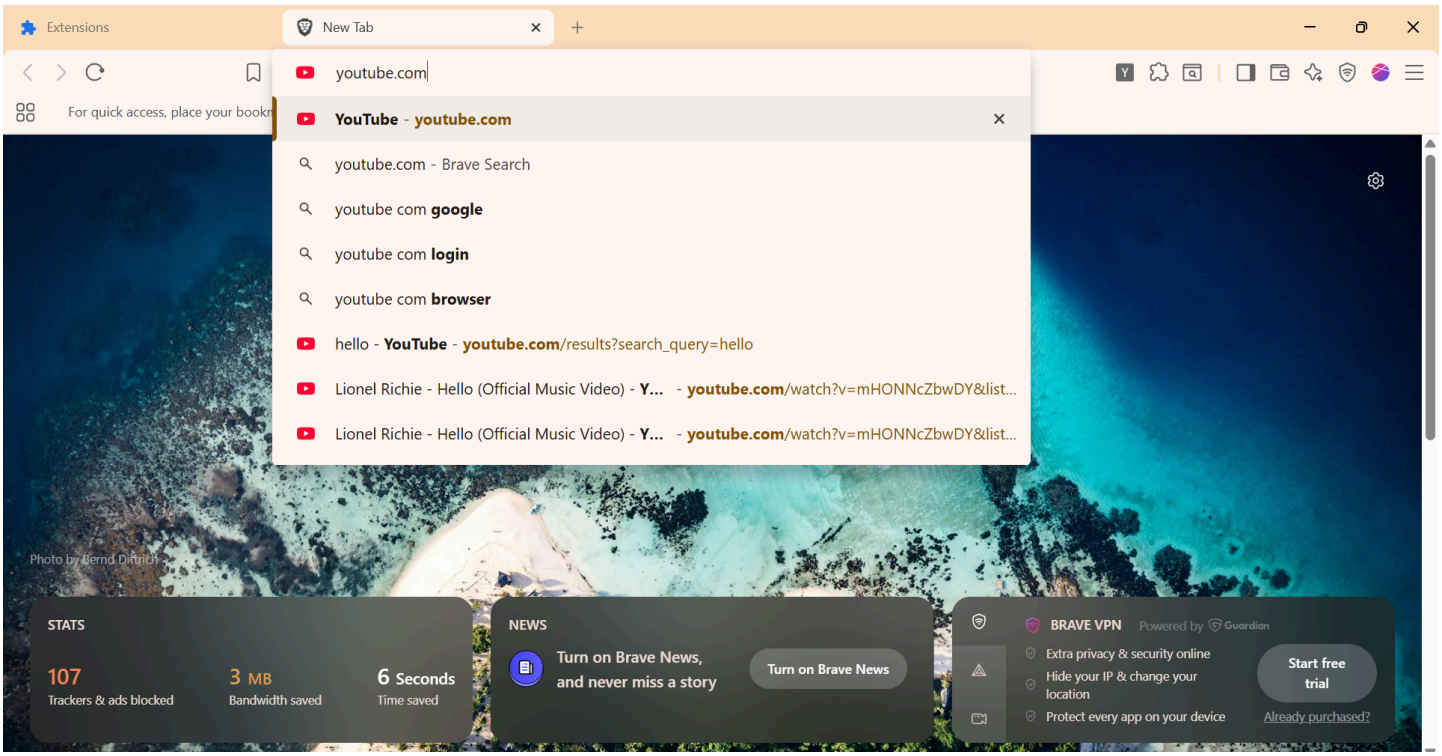
Step 7: Click the Puzzle Piece icon (Extensions menu) in your browser toolbar.
Find “YouTube Homepage and Shorts Block Extension” and click the Pin icon for easy access.



Step 8: Click the extension icon to open the popup and toggle your preferred settings.
Click "Apply & Refresh" to start your focused YouTube session



Step 9: Open youtube.com and enjoy the magic



My preference is Hide All Shorts and Disable Infinite Scroll

Important Information

Updates: If you change the code or download a new version, go back to the Extensions page and click the Reload icon (circular arrow) on the extension card.

Data: Your settings (like the Shorts toggle) are saved locally in your browser's storage.

Permissions: The extension requires access to youtube.com to modify the layout and tabs permission to refresh the page when you save settings.
